PROFESSIONAL SUMMARY

Computer Science undergraduate graduating July 2028 with software engineering experience at Lear Labs and merged contributions to Apache Airflow and Three.js. Built backend APIs, retrieval and evaluation pipelines, and complete mobile applications. Brings Python development, debugging, regression testing, and end-to-end ownership to AI evaluation and benchmark engineering.

EDUCATION

Year	Degree/Exam	Institute	CGPA/Marks
2024-2028	Bachelor of Technology (AI & ML)	Newton School of Technology(ADYPU)	7.5/10.0
2022-2024	Intermediate (Class XII)	Sri Chaitanya	80.0%

EXPERIENCE

Open Source Contributor November 2025 - April 2026
Apache Airflow, Three.js, GitHub Faces *Remote*

- **Apache Airflow:** Fixed log retrieval when hostname information was missing; added two regression tests for worker and triggerer paths, verifying clear errors and no invalid network fetch. Merged PR #64285.
- **Three.js:** Added WebXR hand-model caching to avoid repeated fetches while preserving independent instances (#33252); fixed missing properties in ShaderMaterial copying (#32219). Both merged.
- **GitHub Faces:** Implemented random-user selection and corrected filtering and scrolling behavior. Merged PRs #104, #137, #158.

INTERNSHIPS

Software Engineer Intern / Founding Intern February 2026 - Present
Lear Labs *Bengaluru*

- Software Engineer Intern (Feb-Aug 2026); Founding Intern (Aug 2026-present).
- Built **55+ REST APIs** with FastAPI, Node.js, MongoDB, and PostgreSQL for AI mentor workflows, authentication, role-based access control, and real-time streaming.
- Developed retrieval and evaluation pipelines using pgvector, metadata filtering, background indexing, deterministic scoring, and LLM feedback.
- Built voice agents with LiveKit, Pipecat, WebRTC, and STT/TTS; improved reliability through validation, fallback handling, authentication checks, SSRF protections, and regression tests.
- Built the complete **iOS and Android application for TopRankers.com** from scratch, including API integrations and ownership of mobile implementation.
- Contributed to Atherna, a legal AI product, across UI/UX, developer experience, and security engineering; coordinated with teammates and iterated on feedback.

PROJECTS

NaaMitra AI (Github) (Demo) January 2026

- Built a full-stack lecture assistant with React and FastAPI; processed unstructured lecture content using Python, spaCy, PyTextRank, and TF-IDF for summarization.
- Added API caching and modular backend services to improve responsiveness and maintainability.

Job Portal (Github) (Demo) September 2025

Built a full-stack job platform with React, Node.js, and PostgreSQL. Implemented JWT authentication and role-based access control for users and recruiters; developed REST APIs for job postings, applications, and user management, and optimized SQL queries.

SKILLS

- **Technical Skills:** C++, Python, TypeScript, MySQL, PostgreSQL, SQL, FastAPI, Node.js, React, Git and Github, Docker, MongoDB

RELEVANT COURSEWORK

Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Object-Oriented Programming.

ACHIEVEMENTS

- **Nasiko Buildathon, Microsoft Hyderabad office:** 2nd place among approximately 300 participants; built an LLM request classifier with a teammate for cost-efficient routing. Project post.
- **Coding Relay:** 1st place in the 100 Days of NST ADYPU Coding Relay.
